OTE 86 7585

12 MAY 1986

MEMORANDUM FOR: National Intelligence Officer for  
Counterterrorism

VIA: Director, Office of Management, Planning  
Services

25X1 FROM: [REDACTED]  
Director of Training and Education

25X1 SUBJECT: Disruption of CT Training Cycle [REDACTED]

25X1 1. I am writing to express my dismay at the action of one  
25X1 of the members of your staff, [REDACTED] Specifically, he  
unilaterally effected the withdrawal of [REDACTED] a  
DI-sponsored CT, from a required course in the CT Program even  
though he had been advised by both the Chief, Career Trainee  
Division and the Chief, Management Branch, Career Trainee  
Division that this was not an acceptable solution to his  
25X1 staffing problem. We are particularly disturbed that [REDACTED]  
put a young Career Trainee in the difficult position of trying  
to comply with conflicting instructions from two different  
25X1 offices. [REDACTED]

2. We are sympathetic to the needs of Agency offices  
facing crisis situations and have and will continue to support  
priority requirements with CTs on interim and after-hours  
assignments. We must, however, control these assignments to  
ensure that each CT receives the kind of training desired by his  
or her sponsoring directorate. [REDACTED]

25X1 [REDACTED] Since completion of this  
25X1 course has been mandated by the DI for its CTs, [REDACTED] 25X1  
will have to make up the course during the next running,  
2-13 June 1986, in order to complete the Career Training Program  
25X1 successfully. [REDACTED]

~~CONFIDENTIAL~~

CONFIDENTIAL

25X1 SUBJECT: Disruption of CT Training Cycle [redacted]

25X1 3. I hope that you understand our position on this  
25X1 matter. Although we are willing to support Agency offices  
during crisis situations, we must at the same time maintain the  
integrity and quality of the training provided our Career  
Trainees. [redacted]

cc: D/EURA

25X1 Charlie: Given that [redacted]  
had only spent a couple of weeks, the staff  
was skeptical that her presence was critical  
to your operation. At any rate, it is totally  
unacceptable to have our CTs put into  
the situation that she was put into.  
Sorry about the misunderstanding

CONFIDENTIAL
